DETAILED ACTION

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the sterile portion (claim 4), "several tissue phantoms" (claim 7), "sphere" (claim 11) shape must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claims 1-17,20-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, does the "setting" (line 1) mean? Also, the preamble is confusing, as it 's unclear what the "for training on such a system" is in the alternative of? Are either the "Testing" device or "setting" device associated with the "for training" limitation, or are both? Use of the term "or" twice in the preamble lends itself to ambiguity as to what the alternative are.

As to claim 4, "the sterile portion" lacks antecedent basis. Also, "portion" of what?

As to claim 20, what claim does this depend upon? It's not a multiple dependent claim, and thus may depend upon only one claim.

Art Unit: 2856

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Irion et al is a US equivalent of the WO 9811945 reference submitted by Applicants.

As to claim 1, note was made of the "at least one luminescent area" limitation with remaining limitations. However, no claim could be deemed to contain allowable material in view of the outstanding 112(2) issues herein. References will be reconsidered upon receipt of an amendment that presents clear claims.
